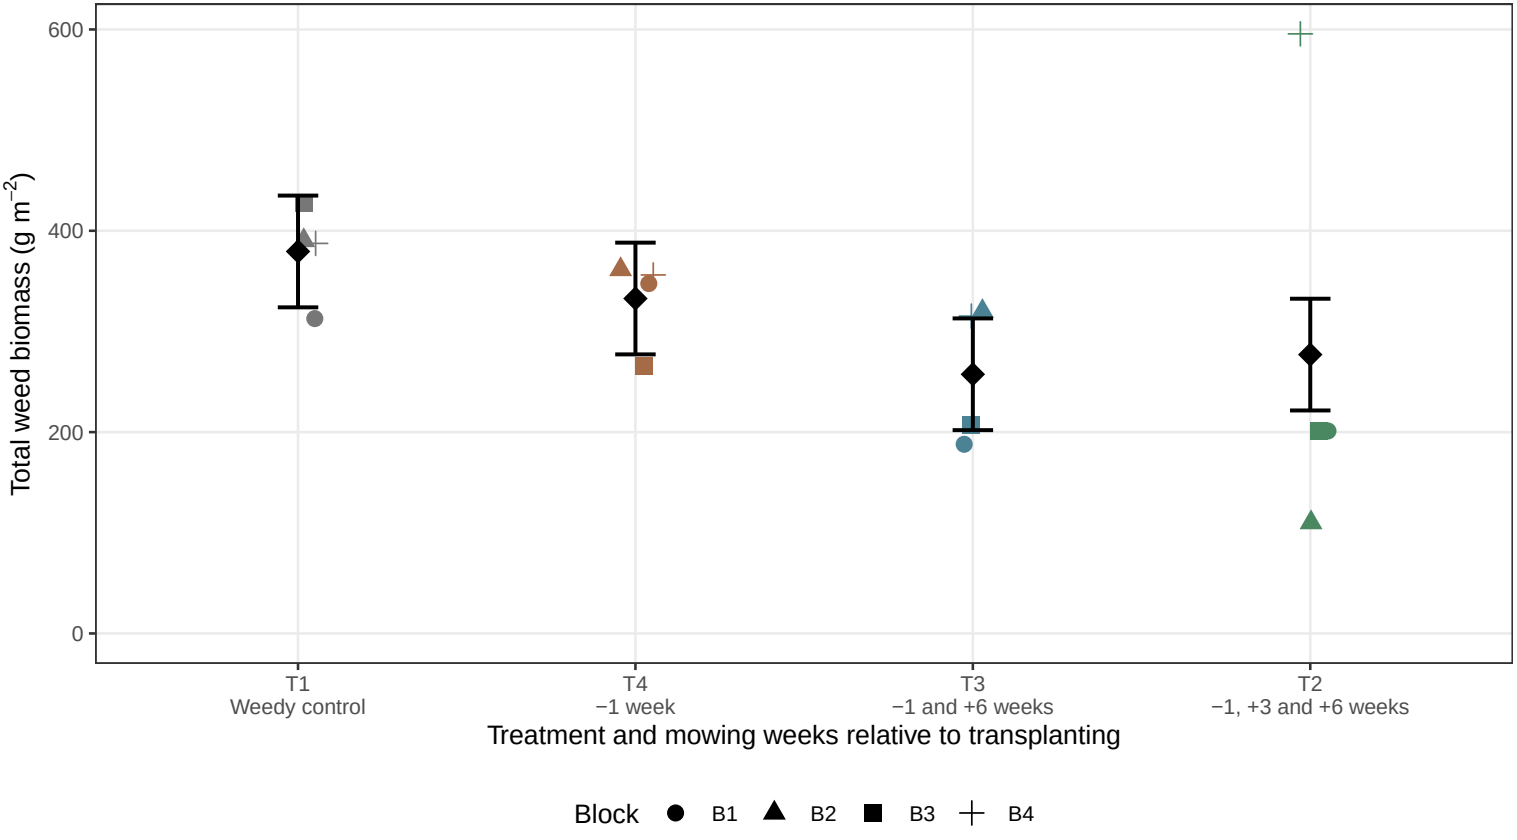
Total weed biomass: Cover crop sampling area

Treatment ANOVA: F(3, 9) = 0.99; p = 0.439



All samples cut at 8 cm. T1: no broccoli or cover crop planted; four quadrats per plot.
T2−T4: two quadrats per plot.
Points: plots; diamonds: adjusted means; bars: +/− 1 model−based SE.
Includes identified and unknown weeds; excludes volunteers and cover crops.
